

Spring Conference

May 6, 2010

De Reehorst, Ede (The Netherlands)

NLUUG

OPEN SYSTEMS, OPEN STANDARDS

CALL FOR ABSTRACTS

System Administration

A system administrator has a daunting task that is ever increasing in complexity. At the NLUUG spring conference, we would like to give system administrators a chance to extend and deepen their knowledge.

We are therefore looking for speakers that can give an interesting lecture or tutorial about one of the many aspects to system administration.

Presentation topics include (but are not limited to):

- **System administration in a virtualized environment**
- **Useful admin tools like CFengine**
- **How to make your servers greener**
- **System tuning (e.g. for large databases)**
- **Forensic Readiness**
- **Integrating Open Source in a Windows environment**
- **Privacy aspects to system administration**
- **Incident response automation**
- **Monitoring, logging and service reporting**
- **The cloud; maximum flexibility or an administrative nightmare?**

Papers for the conference proceedings are welcomed, but not mandatory. Alternatively, we would like to publish a digital version of your presentation with slide notes.

- **DEADLINE ABSTRACTS: JANUARY 5, 2010**
- **ACCEPTANCE NOTIFICATION: JANUARY 12, 2010**

This NLUUG conference is organized by: Congres- en Organisatiebureau Interactie bv – The Netherlands
Stationsweg 73-C • 6711 PL Ede • Phone: (+31) 318 694416 • Fax (+31) 318 694417 • info@interactie.org • www.interactie.org
